## DELIVERY OF NEW VESSEL FOR ATTICA GROUP

Attica Holdings S.A (Attica Group) announces the delivery of the RoRo Cargo vessel Anglia Seaways from DFDS for a cash consideration of Euro 12,050,000. The vessel, built in 2000, has an overall length of 142.5 meters, service speed of 17.5 knots and a garage capacity of 1,680 lane meters or 120 unaccompanied freight units.

The vessel was renamed Blue Carrier 1 and is scheduled to be deployed in Attica's domestic route network. With this investment, the Group increases significantly its freight capacity, supplementing its existing route network.

The vessel is the most modern RoRo Cargo vessel ever deployed in Greek domestic routes. The vessel flies the Greek Flag, as all vessels owned by the Group and has already been crewed by Greek seafarers.

Attica Group, the largest Greek ferry group, continues to invest in the prospects of the Greek economy.

The Board of Directors
